Printed in Great Britain

Contents of Volume 106

Number 1, 7 January 1984

PROTHERO, J., Scaling of Standard Energy Metabolism in Mammals: I. Neglect of Circadian Rhythms 1

BARDAKJIAN, B. L., EL-SHARKAWY, T. Y. and DIAMANT, N. E., Interaction of Coupled Nonlinear Oscillators having Different Intrinsic Resting Levels 9

PRABHAKARAN, M., Spatial Constraints and Group Behaviour in Globular Proteins 25

COSTANZA, R. and NEILL, C., Energy Intensities, Interdependence, and Value in Ecological Systems: A Linear Programming Approach 41

HARRISON, L. G., SNELL, J. and VERDI, R., Turing's Model and Pattern Adjustment after Temperature Shock, with Application to *Acetabularia* Whorls 59

AKINTONWA, D. A. A., Theoretical Aspects of Enzyme Induction and Inhibition Leading to the Reversal of Resistance to Biocides . 79

Number 2, 21 January 1984

MAHAFFY, J. M., Cellular Control Models with Linked Positive and Negative Feedback and Delays. I. The Models . . . 89

MAHAFFY, J. M., Cellular Control Models with Linked Positive and Negative Feedback and Delays. II. Linear Analysis and Local Stability 103

MOLDAWER, L. L., SOBRADO, J., BLACKBURN, G. L. and BISTRIAN, B. R., A Rationale for Administering Leukocyte Endogenous Mediator to Protein Malnourished, Hospitalized Patients . 119

LAPIDUS, I. R., Growth and Division Kinetics of Asymmetrically Dividing *Tetrahymena thermophila* 135

LUKE, R. L., Glomerular Permselection: Shape and Flow . . 141

TROYER, K., Microbes, Herbivory and the Evolution of Social Behaviour 157

SANDERS, D. A., Self-Transcription: RNA Polymerase Transcription of its own Genes, and its Role in Cellular Differentiation and Cell Cycling 171

SCOTT, J. A., The Role of Cytoskeletal Integrity in Cellular Transformation 183

WEIHS, D. and WEBB, P. W., Optimal Avoidance and Evasion Tactics in Predator–Prey Interactions 189

LENHOFF, A. M. and LIGHTFOOT, E. N., The Effects of Axial Diffusion and Permeability Barriers on the Transient Response of Tissue Cylinders. II. Solution in Time Domain 207

LETTER TO THE EDITOR

TODD, P. H. and SMART, I. H. M., The Shape of Birds' Eggs . 239

Number 3, 7 February 1984

NUSSINOV, R. and PIECZENIK, G., Structural and Combinatorial Constraints on Base Pairing in Large Nucleotide Sequences . 245

NUSSINOV, R. and PIECZENIK, G., Folding of Two Large Nucleotide Chains 261

SULSKY, D., CHILDRESS, S. and PERCUS, J. K., A Model of Cell Sorting 275

SCHLITTER, J., Rapid Energy Exchange of Enzymes with Solvent Water by Bipolar Interaction 303

JURETIĆ, D., Efficiency of Free Energy Transfer and Entropy Production in Photosynthetic Systems 315

LANDMAN, K. A., A Continuum Model for a Red Blood Cell Transformation: Sphere to Crenated Sphere 329

CUMMINGS, A. M. and YOCHIM, J. M., Differentiation of the Uterus in Preparation for Gestation: A Model for the Action of Progesterone 353

DERR, R. F., The Ethanol Withdrawal Syndrome: A Consequence of Lack of Substrate for a Cerebral Krebs-Cycle . . . 375

PERRY, D. A., A Model of Physiological and Allometric Factors in the Self-thinning Curve 383

OBERLEY, L. W. The Role of Superoxide Dismutase and Gene Amplification in Carcinogenesis 403

HONDA, H., YAMANAKA, H. and DAN-SOHKAWA, M., A Computer Simulation of Geometrical Configurations During Cell Division 423

LETTER TO THE EDITOR

HUTCHINSON, G. E. and TONGRING, N., The Possible Adaptive Significance of the Brooks–Dyar Rule 437

Number 4, 21 February 1984

BIRKY, C. W. and SKAVARIL, R. V., Random Partitioning of Cytoplasmic Organelles at Cell Division: The Effect of Organelle and Cell Volume 441

FERRIER, J., Osmosis and Intermolecular Force 449

CALLOW, R. S. and GLADWELL, I., A General Treatment of Chromosome Synapsis in Even-numbered Polyploids 455

BERKOWITZ, G. C. and TSCHIRGI, R. D., On the Phylogeny of Asymmetry and Spatial Discrimination 495

BULMER, M. G., Risk Avoidance and Nesting Strategies . . 529

MASSALDI, H. A. and BORZI, C. H., The Physico-Chemical Mechanism of Mediated Transport I. Facilitated Diffusion . . 537

EL-RIFAI, M. A., Active Transport Membrane Concentration Amplifiers 559

DOMACH, M. M. and SHULER, M. L., Testing of a Potential Mechanism for *E. coli* Temporal Cycle Imprecision with a Structural Model 577

JAFFE, K., Negentropy and the Evolution of Chemical Recruitment in Ants (Hymenoptera: Formicidae) 587

MAGUIRE, M. P., The Mechanism of Meiotic Homologue Pairing 605

Index to Volume 106

Acetabularia whorls, Turing's model and pattern adjustment after temperature shock with application to, 59
Active transport membrane concentration amplifiers, 559
Adaptive significance of the Brooks–Dyar rule (letter), 437
AKINTONWA, D. A. A., Theoretical aspects of enzyme induction and inhibition leading to the reversal of resistance to biocides, 79
Allometric and physiological factors in the self-thinning curve, a model of, 383
Amplification, gene, and superoxide dismutase, their role in carcinogenesis, 403
Amplifiers, active transport membrane concentration, 559
Ants (Hymenoptera: Formicidae), negentropy and the evolution of chemical recruitment in, 587
Asymmetry and spatial discrimination, on the phylogeny of, 495
Axial diffusion and permeability barriers, effects on the transient response of tissue cylinders; solution in time domain, 207

BARDAKJIAN, B. L., EL-SHARKAWY, T. Y. and DIAMANT, N. E., Interaction of coupled nonlinear oscillators having different intrinsic resting levels, 9
Base pairing in large nucleotide sequences, structural and combinatorial constraints on, 245
Behaviour, group, and spatial constraints in globular proteins, 25
Behaviour, social, microbes, hervibory and the evolution of, 157
BERKOWITZ, G. C. and TSCHIRGI, R. D., On the phylogeny of asymmetry and spatial discrimination, 495
Biocides, theoretical aspects of enzyme induction and inhibition leading to the reversal of resistance to, 79
Bipolar interaction, rapid energy exchange of enzymes with solvent water by, 303
Birds's eggs, shape of (letter), 239
BIRKY, C. W. and SKAVARIL, R. V., Random partitioning of cytoplasmic organelles at cell division: the effect of organelle and cell volume, 441
BISTRIAN, B. R. (see MOLDAWER, L. L.), 119
BLACKBURN, G. L. (see MOLDAWER, L. L.), 119
BORZI, C. H. (see MASSALDI, H. A.), 537
Brooks–Dyar rule, the possible adaptive significance of (letter), 437
BULMER, M. G., Risk avoidance and nesting strategies, 529

CALLOW, R. S. and GLADWELL, I., A general treatment of chromosome synapsis in even-numbered polyploids, 455
Carcinogenesis, the role of superoxide dismutase and gene amplification in, 403
Cell cycling, RNA polymerase transcription of its own genes, and its role in cellular differentiation and, 171
Cell division, a computer simulation of geometrical configurations during, 423
Cell division, random partitioning of cytoplasmic organelles at; the effect of organelle and cell volume, 441

Cell sorting, a model of, 275
Cellular control models with linked positive and negative feedback and delays; linear analysis and local stability, 103
Cellular control models with linked positive and negative feedback and delays; the models, 89
Cellular differentiation and cell cycling, RNA polymerase transcription of its own genes, and its role in, 171
Cellular transformation, the role of cytoskeletal integrity in, 183
Cerebral Krebs-cycle, the ethanol withdrawal syndrome is a consequence of lack of substrate for, 375
Chemical recruitment in ants (Hymenoptera: Formicidae), negentropy and the evolution of, 587
CHILDRESS, S. (see SULSKY, D.), 275
Chromosome synapsis in even-numbered polyploids, a general treatment of, 455
Circadian rhythms, neglect in scaling of standard energy metabolism in mammals, 1
COSTANZA, R. and NEILL, C., Energy intensities, interdependence, and value in ecological systems: a linear programming approach, 41
Coupled nonlinear oscillators having different intrinsic resting levels, interaction of, 9
CUMMINGS, A. M. and YOCHIM, J. M., Differentiation of the uterus in preparation for gestation: a model for the action of progesterone, 353
Cylinders, tissue, the effects of axial diffusion and permeability barriers on the transient response of; solution in time domain, 207
Cytoplasmic organelles, random partitioning of, at cell division; the effect of organelle and cell volume, 441
Cytoskeletal integrity, role in cellular transformation, 183

DAN-SOHKAWA, M. (see HONDA, H.), 423
DERR, R. F., The ethanol withdrawal syndrome: a consequence of lack of substrate for a cerebral Krebs-cycle, 375
DIAMANT, N. E. (see BARDAKJIAN, B. L.), 9
Differentiation, cellular, and cell cycling, RNA polymerase transcription of its own genes, and its role in, 171
Differentiation of the uterus in preparation for gestation: a model for the action of progesterone, 353
Diffusion, axial, and permeability barriers, effects on the transient response of tissue cylinders; solution in time domain, 207
Diffusion, facilitated, and the physico-chemical mechanism of mediated transport, 537
Division of cells, a computer simulation of geometrical configurations during, 423
Division of cells, random partitioning of cytoplasmic organelles at; the effect of organelle and cell volume, 441
Division and growth kinetics of asymmetrically dividing *Tetrahymena thermophila*, 135
DOMACH, M. M. and SCHULER, M. L., Testing of a potential mechanism for *E. coli* temporal cycle imprecision with a structural model, 577

Ecological systems, energy intensities, interdependence and value in; a linear programming approach, 41

Eggs of birds, shape of (letter), 239
EL-RIFAI, M. A., Active transport membrane concentration amplifiers, 559
EL-SHARKAWY, T. Y. (see BARDAKJIAN, B. L.), 9
Energy exchange, rapid, of enzymes with solvent water by bipolar interaction, 303
Energy intensities, interdependence, and value in ecological systems; a linear programming approach, 41
Energy metabolism scaling in mammals; neglect of circadian rhythms, 1
Energy transfer and entropy production in photosynthetic systems, efficiency of, 315
Entropy production in photosynthetic systems, efficiency of free energy transfer and, 315
Enzyme induction and inhibition leading to the reversal of resistance to biocides, theoretical aspects of, 79
Enzymes with solvent water, rapid energy exchange by bipolar interaction, 303
E. coli temporal cycle imprecision, structural model testing of a potential mechanism for, 577
Ethanol withdrawal syndrome: a consequence of lack of substrate for a cerebral Krebs-cycle, 375
Evolution of chemical recruitment in ants (Hymenoptera: Formicidae), negentropy and, 587
Evolution of social behaviour, microbes hervibory and, 157

Feedback, positive and negative, and delays, cellular control models with; linear analysis and local stability, 103
Feedback, positive and negative, and delays, cellular control models with; the models, 89
FERRIER, J., Osmosis and intermolecular force, 449
Folding of two large nucleotide chains, 261
Force, intermolecular, and osmosis, 449
Free energy transfer and entropy production in photosynthetic systems, efficiency of, 315

Gene amplification and superoxide dismutase, their role in carcinogenesis, 403
Geometrical configurations during cell division, a computer simulation of, 423
Gestation, differentiation of the uterus in preparation for; a model for the action of progesterone, 353
GLADWELL, I. (see CALLOW, R. S.), 455
Globular proteins, spatial constraints and group behaviour in, 25
Glomerular permselection: shape and flow, 141
Group behaviour and spatial constraints in globular proteins, 25
Growth and division kinetics of asymmetrically dividing *Tetrahymena thermophila*, 135

HARRISON, L. G., SNELL, J. and VERDI, R., Turing's model and pattern adjustment after temperature shock, with application to *Acetabularia* whorls, 59
Herbivory, microbes and the evolution of social behaviour, 157
Homologue pairing, meiotic, the mechanism of, 605
HONDA, H., YAMANAKA, H. and DAN-SOHKAWA, M., A computer simulation of geometrical configurations during cell division, 423
HUTCHINSON, G. E. and TONGRING, N., The possible adaptive significance of the Brooks–Dyar rule (letter), 437

Intermolecular force and osmosis, 449

JAFFE, K., Negentropy and the evolution of chemical recruitment in ants (Hymenoptera: Formicidae), 587
JURETIĆ, D., Efficiency of free energy transfer and entropy production in photosynthetic systems, 315

Krebs-cycle, cerebral, the ethanol withdrawal syndrome is a consequence of lack of substrate for, 375

LANDMAN, K. A., A continuum model for a red blood cell transformation: sphere to crenated sphere, 329
LAPIDUS, I. R., Growth and division kinetics of asymmetrically dividing *Tetrahymena thermophila*, 135
